Who: Erik Pohle, Matthew Wu, Abdulaziz Alabdulrazzaq, Anand Zupa

Title: Hunger: Null

UAT:

Task: Create a document that describes how at least three features within your finished product will be tested. The test plans should include specific test cases (user acceptance test cases) that describe the data and the user activity that will be executed in order to verify proper functionality of the feature.

Feature 1: Find user location

     Action: Find user location via IP address

     Inputs: User clicks "find my location" button

     Expected Output: Google Maps API updates to pin users current location

     Test Browser: Google Chrome

     Test Comments: Make the "find my location" button larger/easier to find

Feature 2: Hovering over different cards on homepage "expands" the cards

     Action: User hovers over a restaurant card

     Inputs: User hovers over a restaurant card, without clicking

     Expected Output: The cards will expand, showing the restaurant being offered from each of the different food services

     Test Browser: Google Chrome

     Test Comments: The cards need to expand out, to show the delivery price for the restaurant from each food service

Feature 3: Apply filters to options

Action: Have the user select the "Pizza" filter option

Inputs: User select and enter "Pizza" filter option under "Types of Food"

Expected Output: The webpage will be updated to reflect only places that have pizza

Test Browser: Google Chrome

Test Comments: Webpage updates correctly.
